

Opening information

of the zoological park, the Lez nature reserve and the Montmaur wood

As part of the forest fires prevention, the regulation sets 6 levels of risk depending on meteorological factors :
low, light, moderate, severe, very severe and exceptional.

For your safety, Montpellier city issued a decree (n°2013/0573/T/R) stating :

- The Lez nature reserve, the Montmaur wood and parts of the zoological park are closed to the public in case of severe fire risk,

- The zoological park, the Lez nature reserve and the Montmaur wood are all closed to the public in case of very severe or exceptional fire risk.

We invite you to inquire about the fire risk in the park before your visit by calling the following number :

04 67 54 45 23

Warning : the whole park and the Lez nature reserve may be closed at any time depending on the risk (fire, flood, strong wind...).

In case of alert, you must strictly follow the instructions given by the staff or the loudspeakers.

S.O.S. Emergency number of the park :
06 03 37 26 81

Warning
Risk of falling branches in case of bad weather.

No smoking
Risk of fire

Montpellier city is engaged in a sustainable development policy. In this context, the Lunaret park and its zoo are preserving endangered species, both animal and vegetal.

This environmental policy is reinforced today in the zoo with the restoration of the scrubland, the management of the plant cover and huge renovation works. This exceptional natural heritage is nonetheless fragile, due to its exposure to fire risk. It is the responsibility of us all to respect the safety measures in the context of forest fire prevention.

Counting on your cooperation to respect the safety instructions, we wish you a pleasant stroll in one of Montpellier's largest greenery !

Michaël Delafosse
Maire de la Ville de Montpellier
Président de Montpellier Méditerranée Métropole

For your information

The Lunaret park and its zoo are currently in a restructuring plan process. It involves the creation and the translocation of enclosures, the building of new facilities or the cutting of trees to restore a once lost flora diversity. In this changing environment, we have sometimes the obligation to close some paths and empty certain enclosures temporarily.

Thank you for your understanding.

PARC DE LUNARET
